

Digital Invoice Exchange Hub

3 Way Match Invoices

Generate and submit accurate e-invoices quickly as invoice data are matched against purchase order (PO) data and good receipts information input by buyer. Once the invoices are submitted, buyer will receive an email notification and thereafter will be able to perform payment processing swiftly to you. SESAMi's solution is also able to cater and display statuses of partial invoices for suppliers tracking purposes and future goods delivery or services to be rendered. Start transacting with more than 100 over buyers in SESAMi World Connect via a single login now!

Key Benefits

- › Save time and increase productivity
- › Eliminate invoice data error
- › Quicker payment processing and get paid faster

Digital Invoice Exchange Hub

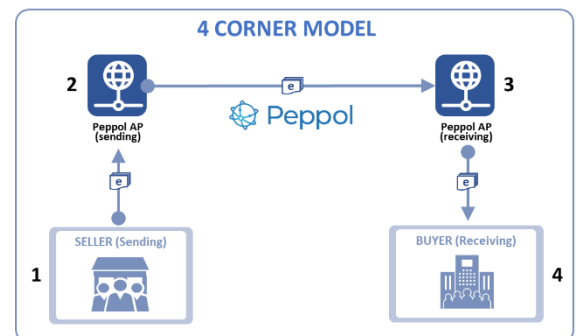

InvoiceNow

SESAMi is a leading Access Point Provider entrusted by both private and public entities (Accountant General Department, Housing & Development Board, JTC Corporation and Maritime Port Authority of Singapore) and a certified solution provider equipped with easy-to-use Peppol Ready solution with API capabilities developed based on REST. InvoiceNow is the preferred e-invoicing channel for the Singapore Government.

InvoiceNow enables buyers and suppliers to exchange standards-based electronic documents through the Peppol network. Access Points is used to connect end users and existing network infrastructures. The communication between Access Points is encrypted and uses digital signatures to ensure the data transmitted over the network is safe and reliable.

Key Benefits

- › Supplier get paid faster
- › Cost Reduction
- › Improve Efficiency
- › Transact Internationally
- › Standardised Invoice Format

1. Seller sends e-Invoice to the Buyer through their appointed Peppol Sender AP
2. Peppol AP (Sending) sends the e-Invoice to the Buyer's Peppol Receiver Access Point.
3. Peppol AP (Receiving) receives the e-Invoice and sends it to the Buyer.
4. Buyer receives e-Invoice and payment can be processed.

Digital Invoice Exchange Hub

EziInvoice

As a supplementary service to our InvoiceNow capability, suppliers can generate and send PDF digital invoices to your customers via email by indicating the recipient email address if customers are not registered on the Peppol Network yet. There are no additional cost or fees incurred for this services with zero transaction capping.

Key Benefits

- › Reduce Paper and Go Green
- › Quicker payment processing and get paid faster
- › Improve Efficiency
